Chief, Training Branch

14 February 1951

Chief, Communications Division

1. Information has been received by the Chief of Communications indicating that the Personnel Procurement Section will have available for entry on duty in the Communications Division a substantial number of trainees within the next two or three weeks. These personnel are a part of those being procured for the basic communications training program. They will be provisionally cleared only at the time of their entry on duty.

2. In view of the urgency of getting this program under way, completion of the Training Center now under construction cannot be awaited before the people available are entered on duty and training started.

3. You are directed, therefore, to get in touch with Mr. Peel's office (Chief, Administrative Services) and obtain on a temporary basis space in which a training school may be established. Students available can be started immediately learning the Morse Code, basic cryptographic principles, and the theory of radio. You should draw suitable instruction equipment from the Materiel Support Section to accomplish this.

4. The school established in accordance with this directive will be considered temporary and the training will be transferred to the [redacted] as soon as the facilities are complete - probably about 1 July.
